

Case Study: A. K. Stone Product

Solution Area:

ERP Implementation - SAP Business One with Fleet Management System

Customer Background

A. K. Stone Product is a fast moving transport organisation based out Kolkata and rendering professional service to different prestigious Infrastructure and Highway projects. AKSP is expanding their wings very fast and to keep pace with its growth, AKSP is in the process of automating its business functions involving all the business activities including HO, Finance, Purchase, Sales, Inventory & Transport Management operation.

The Opportunity

WDC have been awarded with the contract of studying, consulting and deliver SAP Business One as a solution that is built from the ground up to address the needs of companies like Bengal Tools Limited who are looking for an easy-to-use, affordable, yet powerful business application with fast implementation, high performance, scalability, and the ability to evolve as the company grows and the business needs change.

Key Challenges

As we learnt from the discussion that AKSP presently is running Tally Accounting software and also Excel for reporting. Majority of its operations are manual and takes considerable time. This current situation partially meets the needs of the organisation but can't keep pace with the growth of the company that has taken place in the last few years and coming days ahead. AKSP thus wants a more complete and comprehensive solution that will be in harmony with its growing needs. With the implementation of SAP - Business One, all the data would be stored and managed from a centralized relational database with suitable and user friendly user interface for accessing the business data. The details of the solution features are described in the later sections.

Primary Working Areas

The modules include: Materials Management, Stores and Sales and Dispatch; Inventory and Production; Finance and Banking; and Human Resource Management; Customer Relationship Management and custom built Transport Management System each with relevant reports. It also includes Payroll Add-on to address the HR needs for the company.

Infrastructure Components

The server is located at head office with 4 users from HO, and 1 other users access the system from remote sites through internet connection.

Software Components
